## JLM - JEWEL MILLARD

As a multimedia artist, Jewel has worked in many mediums including digital painting, gouache, resin and ink, but clay remains their keystone. Since they first started working with clay through Madison College and the Clay Club, they have set up a home studio, started their own business and helped build a wood kiln with a small group of inspirational women. Jewel is inspired by childhood love of folktales, mythology, and magic, exploring ideas of fantasy, dark whimsy and escapism through the use of colorful illustrations and surface designs. Find more of Jewel's work under the name Geekyloft on all main social media sites.
